

# GET TO KNOW MY CHILD

Dear Educator,

I want to help you get to know my child better. They are recovering from a serious medical condition, and as they recover they may struggle in school due to side effects from their treatment. The more you know about them, the easier it will for you to help them be successful in the classroom.

I want my child to do well in school, even though it may be hard for them at times. We look forward to having a great school year, and I appreciate you working with us. If you have any questions or wish to discuss any of this information, please reach out.

Sincerely,

My Child's Strengths
